High risk pay, five lives, bonuses!

Don't wait! Sign up for high adventure today!

2. GAME PLAY

So you enlisted for adventure, did you? Well, you've come to the right place. Your mission is to reach the City of Mystery at the end of the tunnel and destroy the great Gond with your four-directional laser guns. Sound easy? Well, not so.

First you have to make it through the seven tunnel zones without getting smashed on the tunnel walls, crushed by enemy objects, or zapped by missiles. The more enemy objects you destroy, the more points you earn. But the tougher it gets. If you make it to the City of Mystery and destroy Gond, you earn bonus points. Then you head into the next tunnel, which also leads to the City of Mystery and Gond. Then what? Well, to quote an old Alerian saying: "Like a just one tunnel after another."

YOU!

Now before you climb into your spaceship and enter the first tunnel, take a look at the options.

OPTIONS

One or two players. VANGUARD is set for a one-player game. Press the **#** key on the 3200 keypad to select a two-player game.

Single or Repeat Fire. VANGUARD is set for Single Fire. To select Repeat Fire, press the ***** key on your keypad.

■ **Single Fire.** Press the red fire button (any red button) each time you want to fire.

■ **Repeat Fire.** Hold in the red fire button and fire continuously.

Speed. In order of difficulty, the tunnels are NOVICE, FIRST, SECOND, and THIRD. In the NOVICE tunnel, the pace is slower; you never run out of fuel; your enemies don't shoot; and there are no barriers to trap you. In the Stripe Zone, VANGUARD is set for the FIRST tunnel. Press the **7** key to change tunnels.

Zone You can start the game in any zone except the City of Mystery. WIND(1)K&D is set for the first (Mountain) zone. Press the 7 key to change zones.

When you have selected your options, press the START button and enter the tunnel.

LIVES

Your spaceship has five lives, and earns a bonus life of 10,000 and 50,000 points. The number of lives remaining is shown at the top left of the screen, along with the score and fuel gauge (Figure 1).

FUEL GAUGE

Keep an eye on your fuel gauge as you fly through the tunnels. You use one notch of fuel every second but gain a notch each time you zap an enemy object. It takes about 40 seconds to empty the fuel tanks. Don't run out of fuel or you'll crash. You get a new supply of fuel with each new life.

NOTE You never run out of fuel in the Novice Tunnel.

TUNNEL MAP

Use your tunnel map (Figure 1) to see where you are in the tunnel and where you're heading. The blinking dot marks the location of your spaceship.

Figure 1 = Game Elements

LASER GUNS

Now try out the laser guns mounted forward, aft, and on either side of your spaceship (Figure 2). To fire the aft, starboard, or port guns, move your joystick in the direction you want to fire and press any one

Figure 2 = Laser Guns

of the red fire buttons on your 5200 controller. The forward gun fires automatically when you press the fire button. **WARP DRIVE** Your spaceship moves faster when you are not firing.

TUNNEL TOUR

Ready for a short tour of the tunnel? Then man your spaceship controls: keep your finger on the fire button, and take off!

Mountain Zone (Figure 7). This zone's no picnic! First help Captain Fly to impact on your spaceship. Then Harley rockets fire missiles at you. You can destroy Miss and Harleys with your lasers, but you have to dodge missiles except when your spaceship is operating on energy pod power.

Energy Pods. When you fly through a pod marked E, your spaceship becomes indestructible. You can't fire lasers, but you can crash into enemy objects and score points fast. Pod power lasts only as long as the **WARP DRIVE** theme music plays, after the music ends, a siren warns you to stop crashing and start firing.

Rainbow Zone. From the Mountain Zone you fly up into a Rainbow Zone sparkling with crystals. The scenery's fantastic, but you'll probably be too busy shooting Helm balloons to admire it.

Shy Zone. Shys and stones can break your bones, so clear a tight course through here. It won't be easy with Harleys and Miss shooting missiles at you in the narrow passageway.

Rainbow Zone 2: Are you still with us? Then down you go into another Rainbow Zone. Watch if Armo balloons are attacking in force. Stay on top of them, and fire in all directions. Whew! What next?

Stripe Zone: Better decide fast which route to follow in this zone. Some monsters jump out and stomp on your spaceship on the upper route. Barriers bar your way on the lower route. You can pass barriers if you shoot them at the top or bottom, shooting them in the middle gets you nowhere.

Both routes lead past enemy bases and Floating Paynes. Losers destroy bases but not Paynes. Shields past Paynes while their arms are reloading.

Take heed! Energy pods grow along the lower route. If you can only reach them in time.

NOTE: Barriers and Floating Paynes do not operate in the Rodeo Tunnel.

Rainbow Zone 3: Yet another Rainbow Zone. Finish off the Armo balloons, then head into the Black Zone.

Black Zone: Flying Kamius snakes and spear-shaped Rameda ships call the zone home. Touch a Kamius and he'll carry you through the tunnel to the tune of 1000 bonus points.

But beware! You only get three rides. After the third ride, you have to shoot to kill.

HINT: Kamius snakes revive if you touch the debris. So you can shoot a Kamius and then ride it to score bonus points on top of points. Just be careful not to touch the debris after the third ride.

A train of Rameda ships follows the Kamius snakes. Shoot all the Ramedas you can, but be careful not to run into the debris, it's deadly. Watch out for Ramedas in even numbered tunnels. Some of them return your fire.

CITY OF MYSTERY

You can see that it isn't going to be easy to destroy Gord. He's well protected by the two barriers moving in opposite directions in front of him (Figure 3). Your lasers can hit him only when (and if) the barriers move in sync and leave an opening you can fire through. Keep on firing while you wait for a break. Meanwhile, dodge missiles aimed at the spaceship's starboard (right) side and watch

Figure 3 - City of Mystery

out for the lower bonuses they're creeping up on you. Keep cool and don't panic. The more time it takes you to hit Gold, the more bonus points you earn.

NOTE: Gold doesn't fire at you in the Nowise Tunnel.

CONTINUE FEATURE

When you lose your last life, you can continue your mission from wherever you are in the tunnel; you do not have to return to the beginning. To continue through the tunnel, press the Q key on your keypad or your red fire button when GAME OVER ap-

pears on your screen. The lives counter will reset to 5 and the score counter to 0.

If you're holding in the fire button when you lose your last life, there will be no interruption in the game. The lives and score counters will reset, but GAME OVER will not appear.

TWO-PILOT MISSIONS

If there are two of you, the pilot using the left controller has the first command. When he loses a life, the second pilot takes over. Pilots alternate turns until one pilot loses his last life. The surviving pilot continues until he too loses his last life; then the game ends. Use the left controller to start a new game or continue through the tunnel.

5. STRATEGY

IRING SLOWS YOU DOWN Hold your fire whenever you need a burst of speed to pass Payne's, dodge missiles, or dive for energy pods.

MISS AND HARPER Keep the spaceship moving up and down to avoid missiles, and fire vertically against the enemy's line of flight.

RAINBOW ZONES Before entering a Rainbow zone, advance your spaceship to the middle of the screen. This will prevent you from crashing into the tunnel walls as you enter. To avoid getting rapped from above or below, fire your starboard and port guns alternately.

STARS ZONE Go for the energy pod first, then crash into as many high-scoring targets as you can while pod power lasts. When firing, fire on approach. Don't fire at Payne's. You can't destroy them, and firing slows you down.

CITY OF MYSTERY To stay alive in the City of Mystery and earn lots of bonus points, you have to dodge missiles. Wait for the first missile to appear, then quickly move to avoid it. Keep changing your position while firing at Gond. If you're lucky, you'll hit Gond before he hits you.
